

Economical Series Light Box

High Standards at an affordable price!

The Economical light box series is aimed at high volume, low budget applications while maintaining the design and manufacturing integrity of pricier models. The multipurpose steel constructed series is used in a variety of point of purchase and retail environments. The Economical light box is available in single or double-sided models. This highly popular series provides easy service and graphic access. Our history of designing and producing lighting fixtures for over 50 years ensures your image is free of shadows and hot spots.

We guarantee the best prices available. You won't see us at trade shows or in trade publications doing 4-color ads, we want to pass those savings on to you. Call us now. We will not be outbid!

The Advantage

- Side load graphic design allows for efficient graphic change outs
- Spot welded steel construction provides a strong alternative to plastic thermal formed units
- Compliance to UL / CUL criteria unique in economical style light boxes
- Custom shapes available
